# Executive Summary

wBizManager is a comprehensive cloud-native ERP platform designed specifically for small and medium enterprises in emerging markets. The platform delivers integrated financial management, inventory control, human capital management, and compliance automation in a single unified interface.

## Core Modules

- **Financial Management**

End-to-end accounting with general ledger, AP/AR, bank reconciliation, and multi-currency support.

- **Inventory & Supply Chain**

Real-time tracking across warehouses with automated reorder points and barcode scanning.

- **Human Capital Management**

Payroll processing, leave management, performance tracking, and regulatory compliance.

- **Sales & CRM**

Lead management, opportunity tracking, quotation generation, and customer analytics.

- **Compliance & Reporting**

Automated tax calculations, regulatory filing, and comprehensive audit trails.
